

Civmec Construction and Engineering is an integrated, multi-disciplined construction and engineering service provider to the oil and gas, metals and minerals, infrastructure and marine and defence markets.

Our commitment is to prevent any damage or adverse effects to the environment as a result of our business activities.

Strong environmental performance is a major component to the ongoing success and growth of our Company. A key part of our business strategy and operating methods is the commitment to reduce our environmental impacts and continually improve our environmental performance.

We will manage natural resources in a responsible manner ensuring minimal wastage to these valuable assets and develop work processes that identify and reduce waste as a priority.

We promote pollution prevention, support conservation and recycling, create environmental awareness amongst employees and encourage employees to work in an environmentally responsible manner.

Civmec will influence our subcontractors with our approach towards responsible environmental practices.

We operate in compliance with all relevant environmental legislation, client requirements and voluntary commitments to protect the environment.

Environmental objectives and targets to assist in meeting our environmental commitments are developed, monitored and reviewed on an ongoing basis.

Civmec is committed to conducting operations in a manner which protects the environment.
