CIVMEC CONTINUES GROWTH WITH ADDITIONAL EPC CONTRACT AWARD

SINGAPORE – 06 June 2017 – Australia-based **Civmec Limited** (“**Civmec**” or the “**Group**”) has secured a significant Engineering, Procurement and Construction (EPC) contract as well as other new construction and maintenance contracts for clients in the metals and minerals market with a combined value of approximately AUD \$90 million.

Building on its successful track record of delivering on other previous and current EPC projects, Civmec is pleased to announce that it has been awarded this contract by **Alcoa of Australia Ltd.**

Civmec will undertake the engineering, procurement, delivery, construction, integration, commissioning and performance testing of a filter facility, materials handling system and associated supporting infrastructure at Alcoa’s Pinjarra Alumina Refinery, located 80 kilometres south of Perth in Western Australia.

Civmec’s solution includes integrating the world’s largest plate and frame filters with the materials handling system. The contract will be executed over the next 18 months by a skilled workforce of more than 200 people.

Civmec has also been awarded a civil concrete contract by **Altura Mining Lithium Operations Pty Ltd** for the construction of their new lithium plant located in Port Hedland in the Pilbara region of Western Australia.

Construction activities will commence immediately and will see Civmec further expanding its client and knowledge base by delivering a project in lithium, an emerging mineral being mined in Australia.

In conjunction with the above awards, Civmec has recently also been awarded various maintenance, rectification and refractory projects for a range of resources clients across Australia, including in Queensland, South Australia and Western Australia.

Civmec’s Chief Executive Officer, Mr. Patrick Tallon said: “We work hard with our clients to ensure they are getting the best overall solution for their important projects and it is very satisfying to see our efforts being rewarded with these latest contract awards. Having recently delivered refractory and maintenance work for Alcoa it is pleasing that they, and our other existing and new clients, see the value in our proven self-delivery model”.

“Over the previous year we have focused heavily on ensuring we enter the new financial year with a healthy order book and we now look forward to conscientiously delivering our work in hand and continue our growth and success”.
